

Canada's Terrestrial Ecozones **Student Activity Sheets**

Name: _____

**Most of the answers to these questions can be found in the Ecozones of Canada background sections.*

1) In Scientific terms what is an Ecozone?

2) In Canada, each ecozone is subdivided into smaller sections. List here how many ecozones there is in Canada and how many divisions each smaller section have?

3) What characteristics make up an ecodistrict?

4) How many ecozones in Canada currently contain a national park? Which ones do not?

Number of ecozones with at least one National Parks: _____

Number of ecozones with no National Parks: _____

List of ecozones with no National Parks:

5) List four characteristics of an Arctic habitat.

6) What is permafrost? What do you know about its characteristics?

Explore the following site to help answer these questions on permafrost.

7) In which ecozone does permafrost lie beneath the entire ecozone?

8) What threat to the environment is there if large areas of permafrost are destroyed?

9) Look at these four pictures and identify which one is showing a U-shaped valley, a V-shaped valley, a fjord and an alpine glacier. As well, explain its formation process as you describe each picture below.

**These pictures are taken from the website http://sts.gsc.nrcan.gc.ca/tsdweb/landf_new.asp*

A. _____

B. _____

C. _____

D. _____

10) Which ecozone contains the only known nesting site of the Whooping Crane?

11) Which ecozone has no amphibians or reptiles? Explain why?

12) What is the Canadian Shield? What significance does it have for Canada?

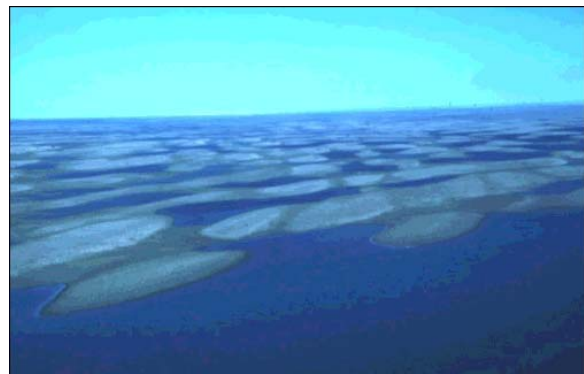

13) Explain the physical action of glaciers on this shield.

14) From these pictures, identify and explain the following glacier deposits: drumlin, frontal moraine, esker, pingo, and erratic bloc.

**These pictures are taken from the website http://sts.gsc.nrcan.gc.ca/tsdweb/landf_new.asp*

A. _____

B. _____

C. _____

D. _____

E. _____

15) What constitutes the oldest rocks in the world?

16) What is the tree line?

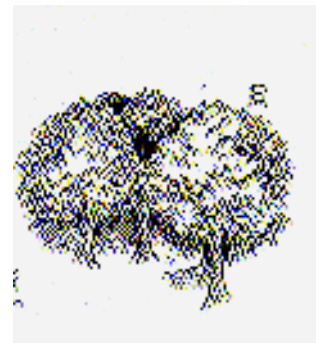

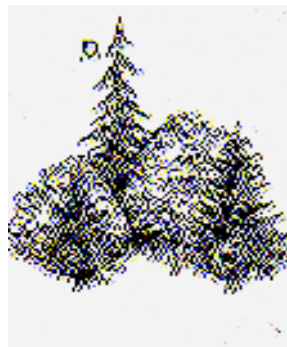

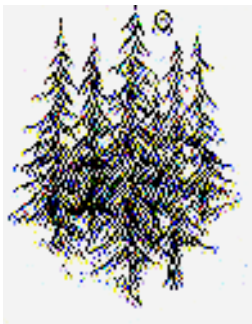

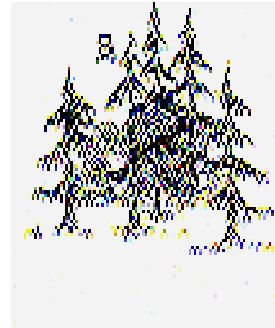

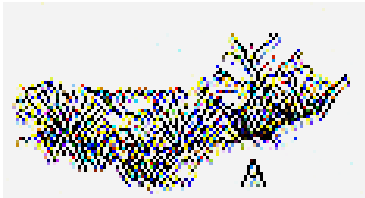

17) What is a transition forest and what type of vegetation would you find there?

18) Which coniferous tree, named as one of the species of the mixed wood forest of the Taiga Plains, would lose its needles in winter, become reddish in autumn and is used by aboriginal to make decoy birds for hunting geese?

19) List four characteristics of a Boreal habitat.

20) Look at the different pictures and identify which one illustrates a transition forest, a mixed forest, tundra, a boreal forest and a deciduous forest.

**These pictures have been scanned and modified from the teacher's guide Geography of Quebec and Canada, Gaston Giroux, Gaston Joyal, 1986, P. 152.*

21) What are the major timber producing ecozones of Canada?
