

## **Applied Performance Task, Expectations and Rubric**

### **The Task**

Students begin by examining various aspects of Canada's ecozones. Students will create a tourism brochure outlining which ecozone in Canada is the best place to live. The brochure will outline the landforms, climate, vegetation, wildlife, and the human activities occurring within the chosen ecozone. In their brochure, students are to justify why in their opinion this ecozone is the best place to live or visit. Justification can include employment, recreational opportunities, standard of living or any other criteria they feel is important. The completed brochure is to include supporting visuals, such as maps, graphs, charts, diagrams, or pictures.

### **Expectations**

This task gives students the opportunity to demonstrate achievement of the following selected expectations from three strands: Geographic Foundations: Space and Systems; Human-Environment Interactions; and Methods of Geographic Inquiry.

*Students will:*

1. describe selected Canadian ecozones;
2. demonstrate an understanding of how natural and human systems interact within ecozones;
3. analyse the natural and human factors that create regions;
4. demonstrate an understanding of how natural systems (e.g., climate, soils, landforms, natural vegetation, wildlife) influence cultural and economic activities (e.g., recreation, transportation, employment opportunities);
5. use appropriate technology (e.g., computer maps, graphs, air photos) to present geographic information;
6. select and use appropriate methods for displaying geographic data.

### **Prior Knowledge and Skills**

To complete this task, students are expected to be able to demonstrate the following:

- knowledge of the definition of an ecozone
- knowledge of some of Canada's ecozones and their physical characteristics (e.g. landforms, climate, vegetation, and soils)
- relate the landforms, climate, vegetation, and human activities to ecozones in different parts of the country
- understanding of research methods using a variety of source materials
- ability to read, analyse, and interpret graphs and maps
- ability to use a variety of tools and technologies for research

## Task Rubric – Canada’s Ecozones a good place to live

| Expectations                            | Criteria                                                                                                                                              | Level 1 (50 – 59)                                                                                                                                                        | Level 2 (60 –69)                                                                                                                                                 | Level 3 (70 – 79)                                                                                                                                                                  | Level 4 (80-100)                                                                                                                                                       |
