

Academic Performance Task, Expectations and Rubric

The Task

Students begin by examining land use patterns in Canada. Each student is to develop a proposal for a new resort location. In their proposal, students are to justify their site selection and the type of resort they are proposing. The final report will demonstrate how their collected research justifies their proposed location. Students are instructed to include supporting visuals, such as maps, graphs, charts, diagrams, or pictures, in support of their proposals.

Expectations

This task gives students the opportunity to demonstrate achievement of the following selected expectations from three strands: Geographic Foundations: Space and Systems; Understanding and Managing Change; and Methods of Geographic Inquiry.

Students will:

1. identify and analyse patterns of spatial organization, including land use, population distribution, and ecozones;
2. demonstrate an understanding of how natural and human systems interact within ecozones;
3. predict the consequences of human activities (e.g., agriculture, recreation) on natural systems (e.g., soil depletion, climate change);
4. demonstrate an understanding of the methods used to collect, organize, manipulate, and interpret geographic data;
5. select and use appropriate methods for displaying geographic data;
6. create and use effectively photographs, charts, graphs, models, and diagrams;
7. use geographic data to support conclusions and opinions.

Prior Knowledge and Skills

To complete this task, students are expected to be able to demonstrate the following:

- knowledge of land covers and their associated land use
- understanding of research methods using a variety of source materials
- knowledge of Remote Sensing and Image Interpretation
- ability to read, analyse, and interpret satellite imagery and maps
- ability to use a variety of tools and technologies for research.

Task Rubric – Proposal for a New Resort

Expectations	Criteria	Level 1 (50 – 59)	Level 2 (60 –69)	Level 3 (70 – 79)	Level 4 (80- 100)
<u>Knowledge / understanding</u>					
1,2	- Identifies and analyses patterns of spatial organization, including land use, population distribution, and ecozones - Demonstrates understanding of the relationship between natural and human systems	- Identifies few patterns of spatial organization - Demonstrates limited understanding of the relationship between natural and human systems	- Identifies some patterns of spatial organization - Demonstrates some understanding of the relationship between natural and human systems	- Identifies and analyses patterns of spatial organization - Demonstrates considerable understanding of the relationship between natural and human systems	- Identifies and analyses patterns of spatial organization to a high degree - Demonstrates thorough understanding of the relationship between natural and human systems
<u>Thinking / Inquiry</u>					
4, 5	- Uses a variety of relevant supporting facts and details - Explains the significance of the information selected	- Uses a limited variety of relevant supporting facts and details - Explains the significance to a limited degree	- Uses some variety of relevant supporting facts and details - Explains the significance to some degree	- Uses a considerable variety of relevant supporting facts and details - Explains the significance to a considerable degree	- Uses a wide variety of relevant supporting facts and details - Explains the significance to a high degree
<u>Communication</u>					
6,7	- Uses visuals to illustrate the importance of the resort site - Writes a clear and convincing proposal	- Uses visuals to illustrate the importance to a limited degree - Writes a proposal that is not very clear or convincing	- Uses visuals to illustrate the importance to some degree - Writes a proposal that is somewhat clear and convincing	- Uses visuals to illustrate the importance to a considerable degree - Writes a proposal that is generally clear and convincing	- Uses visuals to illustrate the importance to a high degree - Writes a proposal that is very clear and convincing
<u>Application</u>					
3	Explains environmental and social implications of the resort development in the selected ecozones	Shows limited understanding of the implications	Shows some understanding of the implications	Shows considerable understanding of the implications	Shows thorough understanding of the implications
