

Land Use and Land Cover of Canada

Lesson Objectives

- Explore the land cover characteristics of Canada.
- Study the relationships between land cover and land use.
- Learn about Remote Sensing data.
- Investigate image interpretation methods
- Learn about multispectral data and the Landsat Thematic Mapper.
- Study sample Landsat data and investigate the difference between bands
- Learn about image enhancement, how and why to apply it.
- Building a colour composite image.
- Colour enhancements.
- Land cover and land use mapping.
- Site selection

Curriculum Expectations

The Ontario grade 9 curriculum expectations were used as a basis for preparing the lessons in this series. Although there is no direct correlation between Ontario expectations and other provinces, in general, the issues covered in the lessons do relate to many of the curriculum requirements in other jurisdictions. The full curriculum expectations can be found at the Ontario Ministry of Education Web site

English <http://www.edu.gov.on.ca/eng/document/curricul/secondary/canadian/canaful.html>

French <http://www.edu.gov.on.ca/fre/document/curricul/secondary/canadian/canafulf.html>

The performance tasks for Grade 9 Academic were based directly on curriculum expectations selected from the policy document for Canadian and World Studies. The tasks encompassed the four categories of knowledge and skills (i.e., Knowledge/Understanding, Thinking/Inquiry, Communication, and Application), requiring students to integrate their knowledge and skills in meaningful learning experiences.

The rubric for a specific performance task is intended to provide teachers and students with an overview of the expected final product with regard to the knowledge and skills being assessed as a whole. The rubric identifies key criteria by which the students' work is to be assessed, and it provides descriptions that indicate the degree to which the key criteria have been met. The teacher can use the descriptions of the different levels of achievement given in the rubric to assess student achievement on a particular task.
