*(All are thanks to Mr. Jon Greer, Educational Technology Integrator, OCDSB, for giving us the permission to use this PowerPoint Cheat Sheet)

PowerPoint

Action Buttons – Action buttons allow you to create a button that links your slide show to sounds, movies, the web, and other files.

Slide Show | Action Buttons | Select appropriate button and set Action Settings for that button

Action Settings – Action settings are the settings used to assign an action to a button.

Click on object that requires action settings change | Slide Show | Action settings

Applying a design – Applying a design to your presentation creates a theme that encompasses all slides in the presentation

View | Master | Slide Master | Format | Apply Design | Select a Design and click OK. To return to your slide editing screen (View | Slide).

Changing Text – Click on the Text Box and use keyboard to edit

Custom Animation – Allows you to animate objects on the screen. Using this option allows you to make pictures and words fly onto the screen in a number of ways.

- A. Slide Show | Custom Animation | Click on Objects without Animation in the timing tab, and select animate button. The object gets moved into the animation order. Repeat for all objects requiring animation.
- B. To switch animation order, select the item in the animation order and use the turquoise arrows to move the object up or down in the order.
- C. To change the animation effect, select the desired item, and click on the Effects tab. You can now change the Entry animation
- D. To preview animations, click the preview button.

Editing your picture – Click on the picture | Format | Object or Picture

Inserting a New Slide – Insert | New Slide

Inserting a Picture – Insert | Picture | From Clip Art (use Clip Art Library) or From File (to use your own saved images)

Inserting Text Box – Insert | Text Box

Moving Text – Click on the text. Position the mouse pointer over the gray selection box to make the pointer change to a 4-way arrow. Hold down mouse button and drag text to desired location. Release mouse button to place text in new location.

Saving – File | Save As... | Save your File in the desired location

Starting a New Presentation – File | New

Slide Transition – Changes the way that slides switch from slide-to-slide

- A. Slide Show | Slide Transition | Choose your effect
- B. Apply to All affects every slide in your presentation. Apply only affects the way the current slide moves to the next slide.

Views

- A. Slide – View used to edit your slides
- B. Sorter – Provides a contact sheet of all slides in the presentation
- C. Notes – Allows you to enter and edit presentation notes
- D. Master | Slide Master – Allows you to make global changes to your presentation. This slide acts as a template for your entire presentation

Viewing your show – Slide Show | View Show
