

Teacher Package

Academic Lesson

Title: Proposal for a New National Park

Time requirement: Prior learning and skill development:
3 periods of 70 minutes each
ArcView lesson
2 to 3 periods of 70 minutes each
Student research and proposal writing:
4 periods of 70 minutes each

Teacher Instructions:

- Description of the Task
(see Academic Performance Task, Expectations and Rubric).
- Final Product
Each student will submit a written, illustrated, and supported proposal for a new national park in Canada
- Assessment and Evaluation
The final product will be assessed using the Expectations and the Performance Task Rubric. Formal and informal assessment of the students based on prior knowledge, lesson objectives, production of their ArcView Map, research process can be done using the Background Information, the students' activity sheets (on the Background and on the ArcView lesson), the Ecozone Quiz and the Rubric for assessing Maps. Self- or peer assessments and collaboration may be useful to the teacher and students.
- Accommodations
Accommodations that are normally provided in the regular classroom for students with special needs should be provided in the administration of this performance task.
- Rubric
Introduce the task-specific rubric to the students before giving the administrative task. Review the rubric with the students and ensure that each student understands the criteria and descriptions for achievement at each level.
Some students may perform below level 1. It will be important to note the characteristics of their work in relation to the criteria in the assessment rubric and to provide feedback to help them improve.

Teacher Package

Applied Lesson

Title: Computer Presentation of a chosen Canadian Park or Conservation Area

Time requirement: Prior learning and skill development:
3 periods of 70 minutes each
ArcView lesson
2 to 3 periods of 70 minutes each
Computer Presentation
4 periods of 70 minutes each

Teacher Instructions:

- Description of the Task
(see Applied Performance Task, Expectations and Rubric)
- Final Product
In groups of three, students will choose a Canadian park or a Conservation Area and its ecozone for study by choosing one of administrative roles. Each student will create 5 PowerPoint or Corel Presentation slides of the different characteristics of human and natural system in their park and they will have to present to the class.
- Assessment and Evaluation
The final product will be assessed using the Expectations and the Performance Task Rubric. Formal and informal assessment of the students based on prior knowledge, lesson objectives, production of their ArcView Map, research process could be done using the Background Information, the students' activity sheets (on the Background and on the ArcView lesson), the Ecozone Quiz and the Rubric for assessing Maps. In this collaborative activity, self- and peer assessment should be done to ensure that students are collecting appropriate information, and are working well as a team. To facilitate your assessment please see "Record of Individual Participation in a Group and Self-Evaluation Form".
- Accommodations
Accommodations that are normally provided in the regular classroom for students with special needs should be provided in the administration of this performance task.
- Rubric
Introduce the task-specific rubric to the students before giving the administrative task. Review the rubric with the students and ensure that each student understands the criteria and descriptions for achievement at each level.
Some students may perform below level 1. It will be important to note the characteristics of their work in relation to the criteria in the assessment rubric and to provide feedback to help them improve.
