

Teacher Package

Academic Lesson

Title: Proposal for a New Mine Site in Canada

Time requirement: Prior learning and skill development:
1 to 2 periods of 70 minutes each
ArcView lesson:
1 to 2 periods of 70 minutes each
Student research and proposal writing:
1 to 2 periods of 70 minutes each

Teacher Instructions:

- Description of the Task
(see Academic Performance Task, Expectations and Rubric).
- Final Product
Each student will submit a written, illustrated, and supported proposal for a new mine site in Canada
- Assessment and Evaluation
The final product will be assessed using the Expectations and the Performance Task Rubric. Formal and informal assessment of the students based on prior knowledge, lesson objectives, production of their ArcView Map, research process done using the Background Information, the students' activity sheets (on the Background and on the ArcView lesson), the Venn Diagram Activity and the Rubric for assessing Maps. We suggest also that the students investigate the web site "Minerals and Metals – A World to Discover" (http://www.nrcan.gc.ca/mms/school/e_mine.htm). In "Start a mine" students will follow the mining cycle from claim staking through operations to closure of the site and its rehabilitation. You will also find additional information on minerals and metals on this site. Self- or peer assessments and collaboration may be useful to the teacher and students.
- Accommodations
Accommodations that are normally provided in the regular classroom for students with special needs should be provided in the administration of this performance task.
- Rubric
Introduce the task-specific rubric to the students before giving the administrative task. Review the rubric with the students and ensure that each student understands the criteria and descriptions for achievement at each level.
Some students may perform below level 1. It will be important to note the characteristics of their work in relation to the criteria in the assessment rubric and to provide feedback to help them improve.

Teacher Package

Applied Lesson

Title: Minerals and Metals around and in our home Poster

Time requirement: Prior learning and skill development:
1 to 2 periods of 70 minutes each
ArcView lesson:
1 to 2 periods of 70 minutes each
Preparation and presentation of the poster
1 to 2 periods of 70 minutes each

Teacher Instructions:

- Description of the Task
(see Applied Performance Task, Expectations and Rubric)
- Final Product
Each student will submit an 11" x 17" poster that has their ArcView Mines of Canada Map, 15 illustrated objects of Minerals and Metals around and in our home with description of their Minerals and Metals content, the categories (metallic or non-metallic Minerals, Industrial and Construction Minerals, Fossil Fuels etc.) and the ecozone where it is most probable to find such Minerals and Metals.
- Assessment and Evaluation
The final product will be assessed using the Expectations and the Performance Task Rubric. Formal and informal assessment of the students based on prior knowledge, lesson objectives, production of their ArcView Map, research process done using the Background Information, the students' activity sheets (on the Background and on the ArcView lesson), the Venn Diagram Activity and the Rubric for assessing Maps. We suggest also that the students investigate the web site "Minerals and Metals – A World to Discover" (http://www.nrcan.gc.ca/mms/school/e_mine.htm). In "Minerals and Metals at Home", students will discover how minerals and metals are contributing to the quality of our life. They can visit parts of a house and click on different objects to find out what they are made of, and than they can test themselves. They could also explore "Our Hidden Treasures" to find out more about the contributions the minerals and metals industry is making to Canada. Self- or peer assessments and collaboration may be useful to the teacher and students.
