

## Applied Performance Task, Expectations and Rubric

### The Task

Students begin by examining various aspects of Canada's population. The initial inquiry explores population distribution, density, migration, and immigration patterns and explores urban versus rural areas. Following the initial exploration students are to access the data available on the Statistics Canada web site. From this site a vast variety of data can be accessed. These data are to be used to formulate a geographical inquiry into Canada's demographics. Students are asked to produce article headlines to explain patterns they encountered during their inquiry. Their headlines should attempt to explain and predict the changing nature of Canada's demographics. A description should accompany their headlines and should suggest future population trends. Students are instructed to include supporting visuals, such as maps, graphs, charts, diagrams, or pictures to support their headlines.

### Expectations

This task gives students the opportunity to demonstrate achievement of the following selected expectations from three strands: Geographic Foundations: Space and Systems; Understanding and Managing Change; and Methods of Geographic Inquiry.

*Students will:*

- 1) identify and evaluate patterns of spatial organization, including land use, population distribution, and ecozones;
- 2) explain how population patterns reflect cultural diversity;
- 3) analyse statistical data on migration within Canada and between Canada and other nations, to identify migration patterns;
- 4) explain variations in population density and relate overall population patterns to those variations within the local region;
- 5) describe the factors (e.g., regional economic disparities) influencing demographics and migration in Canada;
- 6) demonstrate an understanding of the methods used to collect, organize, manipulate, and interpret geographic data;
- 7) use effectively geographic material from primary sources (e.g., field research, surveys, interviews) and secondary sources (e.g., mainstream and alternative media, CD-ROMs, Internet) effectively and appropriately when researching a geographic issue;
- 8) select and use appropriate methods for displaying geographic data;
- 9) create and use effectively photographs, charts, graphs, models, and diagrams.

### Prior Knowledge and Skills

To complete this task, students are expected to be able to demonstrate the following:

- knowledge of the definition of an ecozone
- knowledge of some of Canada's ecozones and their physical characteristics (e.g. landforms, climate, vegetation, and soils)
- interpret and use population pyramids
- identify the causes of immigration and emigration
- understanding of research methods using a variety of source materials
- ability to read, analyse, and interpret graphs and maps
- ability to use a variety of tools and technologies for research

## Task Rubric – Canada’s Population Trends Headlines

| Expectations                            | Criteria                                                                                                                                                                                                                                                          | Level 1 (50 – 59)                                                                                                                                                                                                                                                                          | Level 2 (60 –69)                                                                                                                                                                                                                                                                                       | Level 3 (70 – 79)                                                                                                                                                                                                                                                                    | Level 4 (80–100)                                                                                                                                                                                                                                                                                       |
