

Teacher Package

Academic Lesson

Title: Canada's Population Trends Newspaper Article

Time requirement: Prior learning and skill development:
1 period of 70 minutes each
ArcView lesson:
1 to 2 periods of 70 minutes each
Student research and proposal writing:
1 to 2 periods of 70 minutes each

Teacher Instructions:

- Description of the Task
(see Academic Performance Task, Expectations and Rubric).
- Final Product
Each student is asked to produce a newspaper article to explain one of the patterns they encountered during their inquiry on population trends. The article should attempt to explain and predict the changing nature of Canada's demographics. Their article should conclude by suggesting ways to prepare for the future. It should also include supporting visuals, such as maps, graphs, charts, diagrams or pictures.
- Assessment and Evaluation
The final product will be assessed using the Expectations and the Performance Task Rubric. Formal and informal assessment of the students based on prior knowledge, lesson objectives, production of their ArcView Map; research process using the Background Information, the students' activity sheets (on the Background and on the ArcView lesson), and the Rubric for assessing Maps. In this lesson, students are going to investigate thoroughly E-STAT via Statistics Canada's web site at www.statcan.ca. Self- or peer assessments and collaboration may be useful to the teacher and students.
- Accommodations
Accommodations that are normally provided in the regular classroom for students with special needs should be provided in the administration of this performance task.
- Rubric
Introduce the task-specific rubric to the students before giving the administrative task. Review the rubric with the students and ensure that each student understands the criteria and descriptions for achievement at each level.
Some students may perform below level 1. It will be important to note the characteristics of their work in relation to the criteria in the assessment rubric and to provide feedback to help them improve.

Teacher Package

Applied Lesson

Title: Canada's Population Trends Headlines

Time requirement: Prior learning and skill development:
1 period of 70 minutes each
ArcView lesson:
1 to 2 periods of 70 minutes each
Computer Presentation
1 to 2 periods of 70 minutes each

Teacher Instructions:

- Description of the Task
(see Applied Performance Task, Expectations and Rubric)
- Final Product
Students are asked to produce article headlines to explain patterns they encountered during their inquiry on population trends. Their headlines should attempt to explain and predict the changing nature of Canada's demographics. A description should accompany their headlines and should suggest future population trends. Students are instructed to include supporting visuals, such as maps, graphs, charts, diagrams or pictures to support their headlines.
- Assessment and Evaluation
The final product will be assessed using the Expectations and the Performance Task Rubric. Formal and informal assessment of the students based on prior knowledge, lesson objectives, production of their ArcView Map; research process using the Background Information, the students' activity sheets (on the Background and on the ArcView lesson), and the Rubric for assessing Maps. In this lesson, students are going to investigate thoroughly E-STAT via Statistics Canada's web site at www.statcan.ca. Self- or peer assessments and collaboration may be useful to the teacher and students.
