ADDITIONAL ACTIVITIES QUIZ (ANSWER SHEET)

State whether the acts below are sustainable activities (SA) or unsustainable activities (UA).

7. Require continual inputs of non-renewable resources (Resources available only in limited quantity. Metals, coal and oil are notable examples) UA
8. Use continuously reliable sources of energy. (Heat from the Earth's core tides the sun (nuclear fusion at a safe distance) and the wind and water in which the sun sets in motion) SA
9. Cause cumulative degradation of the environment (Creating waste which nature cannot handle, or which cannot be absorbed as fast as we create it) UA
10. Come mainly from the qualities of being human (i.e. Creativity, communication, coordination, appreciation and spiritual and intellectual development) SA
11. Use materials in continuous cycles (Re-using materials either through natural process or recycling programs) SA
12. Require resources in quantities that undermine other people's well-being (People taking unfair advantage of others) UA

State whether the following facts are True (T) or False (F).

7. In 1969 a non-profit advocacy organization "Friends of the Earth is formed." T
8. In 1971 Polluter Pays Principle is established stating that those causing pollution should pay the costs. T
9. In 1977 a "Three Mile Island nuclear accident occurs in Pennsylvania, USA. F (1979)
10. In 1981 the "United Nations World Charter for Nature is published. F (1982)
11. A drought in Ethiopia in 1984 results in 250,000- 1 million deaths. T
12. In 1990 the UN summit for Children takes place in recognition of the impact of the environment on future generations. T

State whether the statements below are facts (FA) or fiction (FI)

7. Non-renewable resources minerals and petroleum are unlikely to be depleted (FA)
8. Climate change is one of the most significant sustainable development challenges facing the international community. (FA)
9. On average the typical North American household throws out, on 45% of food due to spoilage, discarded leftover, table wastes etc...) (FI)
10. The average annual rate of reduction in the number of undernourished people in the world is eight million (FA)
11. Imports rose from \$130,000 to \$150,000 in August to reach their highest level in seventeen months (FI)
12. Much of the world is facing severe water scarcity (FA)
