### ***Sustainable development and the ecosystem approach [videorecording]***

[Montréal] : National Film Board of Canada [distributor], [1993]. (17 min.)

Sustainable development describes the spectrum of environmental thinking which ranges between exploitation of the environment for purely economic reasons on the one hand, and strict environmental protection to the exclusion of economics on the other. The video defines sustainable development as a sensible compromise between environmental and economic concerns. Earth's harmony : an argument for changing the way we think portrays humans as agents of profound ecological change, influencing ecosystems from the global to microscopic scales. The video argues that we must begin to see ourselves as part of the Earth's ecology, not apart from it.

### ***Timber for tomorrow [videorecording].***

Burnaby, BC : Classroom Video, c1996. (25 min.) + 1 teacher's guide.

50 years of sustainable logging. This is the story of Merv Wilkinson, an 83 year old sustainable forester who has been logging his forest on Vancouver Island. After 50 years of logging for profit, Wildwood is a beautiful forest park. Nowadays foresters, academics and students come to see how this guru has made it work. In 1995 Merv received an environmental award from the province of British Columbia.

### ***Ah, the money, the money, the money [videorecording] : the battle for Saltspring***

A National Film Board of Canada production ; director, Mort Ransen ; producer, Gillian Darling Kovanic ; editors, Stuart de Jong, Jack Morbin. Montréal : NFB, c2001.(51 min.)

When Saltspring Island, close to the city but full of almost untouched places, becomes the site of a logging operation, the islanders rally to oppose the cutting, fearing the potentially devastating impact on Saltspring's ecology, economy and natural beauty. Mort Ransen turns his camera on his own community to document a lively debate.

### ***The Earth changes [videorecording]***

Produced by Fokus Montréal and the Institute for Cultural Ecology ; written, videotaped and directed by Lee Schnaiberg, Semira Weiss. [Montréal] : The Institute, 2000. (105 min)

This is an award-winning three-part video exploring the complexities of climate change in an objective, entertaining format. This unique production encourages students and citizens to get involved in climate change while extinguishing those fears that the problems are insurmountable. It also not only supplies a steady stream of positive and encouraging solutions led by individuals, corporations, governments, communities, and inventors, but also provides viewers with the tools for responsible participation.

### ***It's eco-logic! [videorecording]***

Lighthouse Management. Port Credit, Ont. : Distributed by McNabb & Connolly, 1997. (16 min.)

Twelve year old Michael thinks his science teacher has gone too far with this homework assignment. How is a kid supposed to save the earth? Michael turns on his computer and gets some unexpected help from Severn Cullis-Suzuki, the youngest winner of the Global 500 Environment Award. She and some friends show Michael that there are lots of things kids like him can do to preserve and protect our environment. It's Eco-logic!

(Available at the Ottawa Public Library: Rosemount Children's videos V363.7 I89)

### ***Great Wall across the Yangtze [videorecording]***

Yangtze Jiang shang de chang cheng / written by Audrey Ronning Topping ; narrated by Martin Sheen ; produced, directed and photographed by Ellen Perry ; executive producers, Danny McGuire and Stephen Moffitt ; production, Stardust Pictures, ITVS. [Alexandria, VA] : PBS Home Video, c2000. (ca. 60 min.)

Investigates the profound changes the Three Gorges dam will bring to China's people, environment, and history.

(Available at the Ottawa Public Library: MRT Audiovisual VH02970)

### ***GoodWood [videorecording]***

Directed by David Springbett. Toronto, ON : Canadian Broadcasting Corporation, 1998.  
(48 min.)

Around the world, the issue of reconciling the interests of consumers, the logging industry and the environment has become the focus of heated debate. The program looks at four forestry-based regions, Honduras, Mexico, the United States and Canada, where communities are discovering their own solutions for creating work and preserving forests at the same time. It shows how sustainable solutions to forest management can benefit us all by illustrating the vital links that are being made to keep people employed and preserve the world's forest.
