

Assessment and Evaluation of Student Achievement

<u>Lesson Plans</u>	Categories Methods	Performance Assessment	Personal Communications
<u>Unit 2</u> Share the Wealth	Knowledge / Understanding Formative	-Simulation games -Open-ended questions -In-class questions and answers	-Can determine students' understanding of the dangers of over-consuming and how to develop management techniques for ensuring the sustainability of resources.
	Thinking / Inquiry Formative	-Simulation games -Open-ended questions	-Allow for more in-depth questioning of the information needed to manage a resource sustainably and of the actions to take.
	Communication Formative	-Simulation games -Discussions	-Explore the importance of communication.
	Application/Making Connections Formative	-Simulation games -Open-ended questions	-Method to get 'authentic' and simulated real world performance.
The Apple of Our Eye	Knowledge / Understanding Formative	-Simulation game -In-class questions and answers	-Can determine students' knowledge of the relationship between world population and per capita quota of ecologically productive land.
	Thinking / Inquiry Formative	-Simulation game -Open-ended questions	-Allow for more in-depth questioning of how finite the earth's fertile land really is and the necessity of adopting sustainable practices.
	Application/Making Connections Formative	-Simulation game	-Simulated real world performance that allows students to appreciate the necessity of adopting sustainable practices.

Ecological Footprint Discussion	Knowledge / Understanding Formative	-Test – multiple choice	-Can determine students' understanding of how much fertile soil their daily activities consume.
	Thinking / Inquiry Formative	-Tally of the class tests -To provoke a debate of the class ecological footprint	-Method to get 'authentic' and simulated real world performance
	Application Formative	-Comparison of their ecological footprint to other countries in the world	-Actions to take to make their ecological footprint smaller.
The Yarn of Life: Part 2	Thinking/Inquiry Formative	-Human Organizer (web)	-Interconnections between life and all of the natural environment.
	Communication Formative	-Class discussions	-Actions and effort to sustain resources (Student's values).
	Application/Making Connections Formative	-Human Organizer (web)	-Real life simulation -Making connections between their values and how they interact in the web.
