GROUP ACTIVITY WORKSHEET

DATE: _____

WORKSHEET 11: SUSTAINABLE DEVELOPMENT AROUND THE WORLD GUIDELINES

Step 1: Using your Country Profiles and Appendix 3: Sustainable Development Criteria, analyze each country's progress toward sustainable development. First look at (1) the current status of each country's economy, (2) the quality of life in each country (social), (3) the state of the environment. Each dimension contains some indicators you may want to consider. Use the Sustainable Development Analysis Chart to fill in your information.

Step 2: Set some goals for sustainable development in the country assigned to your group. For each indicator that you selected, what goals would you set to change the current status of your country and make it more sustainable? Examples might include: "improve water quality" or "improve access to health care for women and children."

Step 3: Finally, identify ways your country can work toward these goals. What specific activities or projects would your country have to set up to accomplish each goal? Identify the scope of the activities you identify (i.e. local, national, international). For example, if the group identified 'improve water quality' as a goal, they should describe how this will be achieved. For instance, they might identify health and hygiene education as a way of improving water quality or the construction of a water filtration process. This would be a local project but with government legislation on appropriate water quality standards.

SUSTAINABLE DEVELOPMENT ANALYSIS CHART			
Dimension	Step 1: Current Status Cameroon	Step 1: Current Status Canada	Step 1: Current Status Nicaragua
1. Economy (Suggested indicators: GDP per capita; trade- related issues; Economic sectors)			
2. Environmental (Suggested indicators: Pollution levels; consumption patterns; biodiversity)			
3. Social (Suggested indicators: fertility rate; literacy rate; child mortality; life expectancy; multiculturalism)
