

Assessment and Evaluation of Student Achievement

Lesson Plans	Categories Methods	Performance Assessment	Personal Communications
Unit 4 Discussion: Agriculture of the World using the Background Information on Sustainable Agriculture	Knowledge / Understanding Formative	-Discussions -In-class questions and answers -Open-ended questions	-Demonstrate an understanding of how human-induced changes in natural systems can diminish their capacity for supporting human activity.
	Thinking / Inquiry Formative	-Discussions -In-class questions and answers -Open-ended questions	-Analyse the impact of past and current trends in agriculture.
	Application / Making Connections Formative	-Discussions -In-class questions and answers -Open-ended questions	-Draw conclusions or make judgments on the basis of reasoned analysis.
GIS Lesson: Global Sustainable Agriculture	Knowledge / Understanding Formative and Summative	-Computer skills -Knowledge of ArcView GIS -Questions and answers with a partner	-Understanding of the technologies used in the analysis and synthesis of geographic data.
	Thinking / Inquiry Formative and Summative	-Questions and answers with a partner	-Analyse cause and effect and sequence relationships in geographical data.
	Communication Formative and Summative	-Cartographic Skills Rubric to produce a map -Evaluate using the Cartographic Skills Rubric	-Map production and layout.
	Application/ Making Connections Formative and Summative	-Evaluate final map product using Cartographic Skills Rubric	-Use different types of maps and images to analyze the consequence of human activities or environmental phenomena.
GIS Homework (Research paper on Global Sustainable Agriculture)	Knowledge / Understanding Summative	-Computer skills -Knowledge of ArcView GIS -Evaluate using the GIS Homework Rubric (research paper on global sustainable agriculture).	-Analyse cause and effects and sequence relationships in geographical data.
	Thinking / Inquiry Summative	-Define a GIS project with other sets of agricultural data. -Define the implications for sustainable development. -Evaluate using the GIS Homework Rubric (research paper on global sustainable agriculture).	-Analyse the impact of past and current trends in agriculture.

	Communication Summative	-Draw conclusions or make judgments or predictions on the basis of reasoned analysis. -Evaluate using the GIS Homework Rubric (research paper on global sustainable agriculture).	-Allows for expression of thoughts and communicating ideas. -Allows for clarity of thoughts and expressions in written form.
	Application / Making Connections Summative	-Produce research paper, maps and images to analyse the consequences of human activities in global sustainable agriculture. -Evaluate using the GIS Homework Rubric (research paper on global sustainable agriculture).	-Engage students in real world tasks. (i.e., relevant and authentic)
