

SUPPLEMENTARY SHEET 4 INITIAL ROLE CARDS

Distribute using the table found in your guidelines

**WORLD TRADE
ORGANIZATION**

You are the representative for the World Trade Organization (WTO). The WTO was created in 1995 to replace The General Agreement on Tariffs and Trade (GATT). GATT was established in 1948 to resolve trade disputes through a series of negotiating rounds. It comprised of 23 of the richest Western countries. At the Uruguay Round in 1987, it was decided that a more formal institution was needed to enforce trade-related decisions. In 1995, the WTO was established to enforce free market values on the global economy with the use of sanctions and fines.

The local banker will hand you your first trading card before the first round.

WORLD BANK

IMF

You are the representative for the World Bank and IMF. The World Bank was one of several financial institutions set up at the end of World War II which aimed to produce an international post-war economic system. The World Bank lends money for long-term development and loans must be repaid over fifteen to twenty years.

The IMF mandate is to regulate an international monetary system to facilitate global trade. It also lends money to members having trouble meeting their financial obligations to other members on the condition that they undertake economic reforms.

The local banker will hand you your trading card and loan sheet before the first round.

***Note:** You will assign one role card to two students for each G country

G1 Country

You are a wealthy country that sells green beads in the global economy. You will be visiting the LDC countries and trading green beads for red beads.

The first thing you need to do is fill out a nametag so that you can be identified by the other players in your class. Your name tag should read: G1.

Next, you must go to your local banker to collect the following items:

- Your first round of green beads
- \$100 Million for trading
- Your first round of trading instructions
- Trading Checklist
- Health and education budget sheets

The main objective in trading is to ensure that your health and education services continue to run smoothly. This is achieved by selling green beads to LDCs. You can use the profits from selling green beads to invest in your country's health and education. When filling out your health and education budgets, you must spend a minimum of \$100 Million on health and education each round. If you do not have enough money, you will have to borrow from the World Bank and IMF. Your first trading card will be distributed shortly. When you receive your first trading card, read it thoroughly and wait for your teacher to instruct you to start trading.

G2 Country

You are a wealthy country that sells green beads in the global economy. You will be visiting the LDC countries and trading green beads for red beads.

The first thing you need to do is fill out a nametag so that you can be identified by the other players in your class. Your name tag should read: G2.

Next, you must go to your local banker to collect the following items:

- Your first round of green beads
- \$100 Million for trading
- Your first round of trading instructions
- Trading Checklist
- Health and education budget sheets

The main objective in trading is to ensure that your health and education services continue to run smoothly. This is achieved by selling green beads to LDCs. You can use the profits from selling green beads to invest in your country's health and education. When filling out your health and education budgets, you must spend a minimum of \$100 Million on health and education each round. If you do not have enough money, you will have to borrow from the World Bank and IMF. Your first trading card will be distributed shortly. When you receive your first trading card, read it thoroughly and wait for your teacher to instruct you to start trading.

***Note:** You will assign one role card to two students for each G country

G3 Country

You are a wealthy country that sells green beads in the global economy. You will be visiting the LDC countries and trading green beads for red beads.

The first thing you need to do is fill out a nametag so that you can be identified by the other players in your class. Your name tag should read: G3.

Next, you must go to your local banker to collect the following items:

- Your first round of green beads
- \$100 Million for trading
- Your first round of trading instructions
- Trading Checklist
- Health and education budget sheets

The main objective in trading is to ensure that your health and education services continue to run smoothly. This is achieved by selling green beads to LDCs. You can use the profits from selling green beads to invest in your country's health and education. When filling out your health and education budgets, you must spend a minimum of \$100 Million on health and education each round. If you do not have enough money, you will have to borrow from the World Bank and IMF. Your first trading card will be distributed shortly. Local Banker – LDC Countries

You should have the following items in your possession:

- Copies of instructions for each of the three Trading rounds for all countries.
- \$100 Million/country
- Record sheets to keep track of the money banked by each country
- Trading Checklist
- Red Beads – Produced by LDCs (They sell ten to each G Country so you need: Total G countries X 10 Red Beads for each G country)

After each country group has read their role cards you are responsible for handing out the resources to each country. Instruct LDC countries to line up at your table to collect the following:

- 10 red beads
- \$100 Million/round
- Trading Checklist
- Trade cards for round 1

When the first round of trading is finished:

- Your role is to take the money spent by each country on their annual Education and Health Budgets. Make sure that they have spent \$100 Million total on health and education.
- After recording the sums paid, give each country representative a copy of the next year's trading round instructions and replenish their beads with the same number as before.
- If countries want to know about borrowing money, refer them to the World Bank/IMF representative.

Local Banker – G Countries

You should have the following items in your possession:

- Copies of instructions for each of the three Trading rounds for all countries.
- \$100 Million/country
- Record sheets to keep track of the money banked by each country
- Trading Checklist
- Green Beads – Produced by G Countries (They sell two to each LDC so you need: Total LDC countries X 2 Green Beads for each LDC country)

After each country group has read their role cards you are responsible for handing out the resources to each country. Instruct the G countries to line up at your table to collect the following:

- 18 green beads
- \$100 Million/round
- Trading Checklist
- Trade cards for round 1

When the first round of trading is finished:

- Your role is to take the money spent by each country on their annual Education and Health Budgets.
- After recording the sums paid in, give each country representative a copy of the next year's Trading round instructions and replenish their beads with the same number as before.
- If countries want to know about borrowing money, refer them to the World Bank/IMF representative.
