

ASSESSMENT AND EVALUATION OF STUDENT ACHIEVEMENT

Lesson Plans	Categories Methods	Performance Assessment	Personal Communications
Unit 4 Discussion: Global Economy using the Background Information on Global Economy	Knowledge / Understanding Formative	-Discussions -In-class questions and answers -Open-ended questions	-Demonstrate an understanding of the interdependence of countries in the global economy.
	Thinking / Inquiry Formative	-Discussions -In-class questions and answers -Open-ended questions	-Analyse the causes and effects of economic disparities around the world.
	Application / Making Connections Formative	-Discussions -In-class questions and answers -Open-ended questions	-Draw conclusions or make judgments on the basis of reasoned analysis.
GIS Lesson: Global Economy	Knowledge / Understanding Formative and Summative	-Computer skills -Knowledge ArcView GIS -Questions and answers with a partner	-Demonstrate and understanding of the technologies used in the analysis and synthesis of geographic data.
	Thinking / Inquiry Formative and Summative	-Questions and answers with a partner	-Analyse cause and effect and sequence relationships in geographical data.
	Communication Formative and Summative	-Cartographic Skills Rubric to produce a map -Evaluate using the Cartographic Skills Rubric	-Map production and layout.
	Application/ Making Connections Formative and Summative	-Evaluate final map product using Cartographic Skills Rubric	-Produce mental, thematic, and choropleth maps to illustrate local or global patterns.
GIS Homework (Research paper on Global Economy)	Knowledge / Understanding Summative	-Computer skills -Knowledge of ArcView GIS -Evaluate using the GIS Homework (research paper on Global Economy)	-Analyse cause and effects and sequence relationships in geographical data. -Conduct an independent inquiry that effectively applies geographic knowledge, skills, methods, and technologies to a selected local, national, or global geographic issue.

	Thinking / Inquiry Summative	-Define a GIS project with other sets Global economy data. -Define the implications for the Global Economy -Evaluate using the GIS Homework (research paper on Global Economy)	-Evaluate factors that may compound problems of hunger and poverty in a selected country. -Select and compare statistical indicators of quality of life for a variety of developed and developing countries in different parts of the world.
	Communication Summative	-Draw conclusions or make judgments or predictions on the basis of reasoned analysis -Evaluate using the GIS Homework (research paper on Global Economy)	-Allows for expression of thoughts and communicating ideas. -Allows for clarity of thoughts and expressions in written form.
	Application / Making Connections Summative	-Produce research paper, maps and graphs to analyse on new aspect of Global Economy. -Evaluate using the GIS Homework (research paper on Global Economy)	-Engage students in real world tasks. (i.e., relevant and authentic)
