

RUBRIC EVALUATION OF STUDENT ACHIEVEMENT

CARTOGRAPHY SKILLS

The Task

Students are expected to develop skills in the art of cartography as they explore Global Economy sets of data. The opportunity to demonstrate cartographic skills can be assessed for this lesson.

Expectations

This task gives students the opportunity to demonstrate achievement of the following expectation from one strand: Methods of Geographic Inquiry.

Students will:

GI2.07 – produce mental, thematic, and choropleth maps to illustrate local or global patterns.

Prior Knowledge and Skills

To complete this task, students are expected to be able to demonstrate the following:

- select and use appropriate methods for displaying geographic data;
- use different types of maps (e.g., road, topographic, thematic) effectively to interpret geographic relationships;
- ability to read, analyse, and interpret graphs and maps
- demonstrate a knowledge of technologies used in geographic inquiry (e.g., Geographic Information Systems (GIS), hypermedia);
- demonstrate an understanding of the methods used to collect, organize, manipulate, and interpret geographic data.
- use statistical methods (e.g., average, median, correlation) effectively when analyzing geographic information.

Task Rubric – Cartographic Skills					
Expectations	Criteria	Level 1 (50 – 59)	Level 2 (60 - 69)	Level 3 (70 – 79)	Level 4 (80 -100)
<u>KNOWLEDGE / UNDERSTANDING</u>					
GI2.07	Title	Fails to identify area shown	Identifies area shown	Identifies area shown, topic and purpose, or focus	Identifies area shown, topic and purpose, or focus is separated with border
<u>THINKING / INQUIRY</u>					
GI2.07	Legend	Offers little explanation of the meaning of symbols and colours	Offers some explanation of the meaning of symbols and colours	Offers considerable explanation of the meaning of symbols and colours	Offers a high degree of explanation of the meaning of symbols and colours
<u>COMMUNICATION</u>					
GI2.07	- Date / projection - Direction: Represented in two ways. - By direction arrow or symbol - By the use of latitude and longitude	- Date / projection is not included - Direction is not included	- Date is included but not projection (or vice versa) - Direction is indicated with arrow	- Date / projection is included - Direction is indicated with arrow and latitude / longitude lines	- Date / projection is included within legend box - Direction is indicated with arrow and latitude / longitude lines are labelled
<u>APPLICATION</u>					
GI2.07	- Scale - Borders	- Fails to allow reader to calculate distance and area - Little use of borders	- Allows reader to calculate distance and area - Some use of borders	- Allows reader to calculate distance and area / shown in appropriate units - Appropriate use of borders	- Allows reader to calculate distance and area / shown in appropriate units / style - The use of borders sets the map apart from other information

Rubric Evaluation of Student Achievement

Task Rubric – GIS Homework (Research paper on global economy)					
Expectations	Criteria	Level 1 (50 – 59)	Level 2 (60 - 69)	Level 3 (70 – 79)	Level 4 (80 -100)
Knowledge / understanding					
GCV.01 SS1.04	- Demonstrate an understanding of the interdependence of countries in the global economy. - Identify different methods of grouping countries and evaluate the implications of categorizing countries in these ways.	- Shows limited understanding of the interdependence of countries in the global economy. - Shows limited methods of grouping countries and evaluating the implications.	- Shows some understand-ing of the interdependence of countries in the global economy. - Shows some methods of grouping countries and evaluating the implications.	- Shows considerable understanding of the interdependence of countries in the global economy. - Show considerable methods of grouping countries and evaluating the implications.	- Shows thorough understanding of the interdependence of countries in the global economy. - Show thorough methods of grouping countries and evaluating the implications.
Thinking / Inquiry					
GIV.04 GI2.02	- Conduct an independent inquiry that effectively applies geographic knowledge, skills, methods, and technologies to a selected issue. - Analyse the causes and effects of sequence relationships in geographical data.	- Limited independent inquiry that effectively applies geographic knowledge, skills, methods, and technologies to a selected issue. - Limited analysis of the causes and effects of sequence relationships in geographical data.	- Some independent inquiry that effectively applies geographic knowledge, skills, methods, and technologies to a selected issue. - Some analysis of the causes and effects of sequence relationships in geographical data.	- Considerable independent inquiry that effectively applies geographic knowledge, skills, methods, and technologies to a selected issue. - Considerable analysis of the causes and effects of sequence relationships in geographical data.	- Thorough independent inquiry that effectively applies geographic knowledge, skills, methods, and technologies to a selected issue. - Thorough analysis of the causes and effects of sequence relationships in geographical data.
Communication					
GI1.02 GI2.10	- Demonstrate an understanding of the technologies used in the analysis and synthesis of geographic data. - Communicate the results of geographic inquiry and analysis effectively.	- Shows limited understanding of the technologies used in the analysis and synthesis of geographic data. - Limited communication of the results of geographic inquiry and analysis.	- Shows some understand-ding of the technologies used in the analysis and synthesis of geographic data. - Some communication of the results of geographic inquiry and analysis.	- Shows considerable understanding of the technologies used in the analysis and synthesis of geographic data. - Considerable communication of the results of geographic inquiry and analysis.	- Shows thorough understanding of the technologies used in the analysis and synthesis of geographic data. - Thorough communication of the results of geographic inquiry and analysis.
Application					
GI2.06	Draw conclusions or make judgments or prediction on the basis of reasoned analysis.	Draw limited conclusions or make limited judgments or predictions on the basis of reasoned analysis.	Draw some conclusions or make some judgments or prediction on the basis of reasoned analysis.	Draw considerable conclusions or make considerable judgments or prediction on the basis of reasoned analysis.	Draw thorough conclusions or make thorough judgments or predictions on the basis of reasoned analysis.
