Conservation Education

http://na.fs.fed.us/spfo/ce/content/for_teachers/curriculum/index.cfm?AudienceToView=27

The Conservation Education program (CE) helps people of all ages understand and appreciate our country's natural resources and how to conserve those resources for future generations. Through structured educational experiences and activities targeted to varying age groups and populations, Conservation Education enables people to realize how natural resources and ecosystems affect each other and how resources can be used wisely.

The Earth Summit

<http://www.johannesburgsummit.org>

The official Earth Summit Website

The EarthWatch Institute

<http://www.earthwatch.org/ed/home.html>

Through our worldwide network of scientists, teacher fellows, and volunteers you can access expedition photos, reports, and lessons online. The links below may take you to sites not owned or operated by Earthwatch. The views and opinions of contributors do not necessarily reflect those of Earthwatch Institute.

Education for Sustainable Development Toolkit

<http://www.esdtoolkit.org/>

The Education for Sustainable Development Toolkit will help schools and communities develop a process for creating locally relevant and culturally appropriate education. This Toolkit is based on the idea that communities and educational systems need to dovetail their sustainability efforts. Ideally, local educational systems can reorient existing curriculums to reinforce local sustainability goals.

Environment Canada

<http://www.ec.gc.ca/>

Welcome to Environment Canada's Internet resource for weather and environmental information. The Green Lane TM helps connect Canadians, exchange information and share knowledge for environmental decision-making.

Environmental Education Web Resources

<http://www.cee-ane.org/www/index.html>

Green Teacher Magazine, The Center for Environmental Education, and the Green Brick Road have collaborated to bring you this index of Environmental Education web sites.

From The Ground Up

<http://www.gatewest.net/~green/from/index.html>

From the Ground Up began as a teachers' lesson guide on food, agriculture, and sustainable development. This on-line version is divided into five lessons; The History of Agriculture and a Description of Sustainable Development; Soil; Agriculture and Chemicals; The Real Cost of Food; and Everything's Connected.

The Gaia Project

<http://www.gaiaproject.bc.ca>

The GAIA Project is a group of dynamic, creative, dedicated individuals whose vision is to live in a world in which ecological integrity, social justice and universal compassion are the norm. We are a project of the Sierra Club of British Columbia, and work toward our goal by modeling and promoting sustainable living through appropriate technologies.

Global Ed. Website

<http://globaled.usaid.gov.au/secondary/casestud/index.html>

The Global Ed. Website is an education resource for students and teachers. It has information on a wide diversity of global issues including development economics, governance, HIV/AIDS, human rights, health, refugees, women, the environment, food security and agriculture. Information on countries assisted by the Australian Government's overseas aid agency is also available.

Green Teacher

<http://www.greenteacher.com/>

Green Teacher is a magazine by and for educators to enhance environmental and global education across the curriculum at all grade levels. With fifty pages of ideas and activities, four times a year; we're not slick... just resource-full.

Headlines from the World Summit

<http://www.earthwire.org/wssd/>

Headlines from the World Summit

The International Institute for Sustainable Development

<http://www.iisd.org>

International Institute for Sustainable Development: Youth Source Book on Sustainable Development

<http://iisd.ca/youth/ysbk000.htm>

IISD is an organization that promotes the transition toward a sustainable future. It seeks to demonstrate how human ingenuity can be applied to improve the well-being of the environment, economy and society.

The Youth Sourcebook was written by an international working group to:

- increase their own awareness of sustainable development issues
- strengthen global youth cooperation and networks

- contribute to the implementation of Agenda 21, the global plan of action agreed to at the Earth Summit.

Learning for a Sustainable Future

<http://www.schoolnet.ca/vp-pv/learning/e/classroom/index.html#thematic>

Learning for a Sustainable Future is a Canadian nonprofit organization whose mandate is to work with educators from across Canada to integrate the concepts and principles of sustainable development into the curricula at all grade levels.

Learning for a Sustainable Future

<http://csf.concord.org/esf/index.cfm>

This project is a five-year effort to develop, revise, and widely disseminate a collection of technology-based educational resources that fills this need. The project will continue an effort begun at the 1992 Earth Summit in Rio by developing the first comprehensive US implementation of sustainable development education.

The Peace and Environment Resource Centre

<http://perc.ca/>

The Peace and Environment Resource Centre strives to educate the public about peace, environment and social justice issues; empower people to get involved in these issues, and support local groups who are involved.

The Sustainability Project

<http://www.cyberus.ca/~sustain1/>

This page assembles the collective wisdom of this spontaneous concern into a picture of our common goal - sustainability. By inviting debate on any part of this vision, we seek to keep the process open minded. For want of any basic disagreement, however, we contend that sustainability should be the value upon which public decisions are based.

The UN Sustainable Development Page

<http://www.un.org/esa/sustdev/>

This website provides links to United Nations Commitments for sustainable development including Agenda 21 and the United Nations Commission on Sustainable Development,

World Bank Development Education Program

<http://www.worldbank.org/html/schools/depweb.htm>

A World Bank site devoted to learning materials for teaching sustainable development. Learning modules include: Social (population growth rate, life expectancy at birth), Economic (GDP per capita) and Environmental (access to safe water).

The World Bank Learning Modules

<http://www.worldbank.org/depweb/english/modules/teachers.htm>

The World Bank Learning Group has developed a series of lesson plans on sustainable development. Learning Modules are divided into three sectors -- social, economic and environmental. Each sector contains modules that explore different issues of sustainable

development through a specific indicator. Currently, these include population growth rate, life expectancy, gross national product (GNP) per capita, and access to safe water. Over time, we will add more sectors and learning modules, as well as improve and build upon the existing ones, incorporating new data and feedback and suggestions from users like you.

World Resources Institute

<http://www.wri.org/enved/index.html>

The World Resources Institute (WRI) is a research and policy institute helping governments, the private sector, environmental and development organizations, and others address a fundamental question: How can societies meet human needs and nurture economic growth while preserving the natural resources and environmental integrity that make prosperity possible.

The World resources Teacher's Guide Units are designed for use at the secondary level. They weave together lessons about both environment and development, both globally and locally.

The WorldWatch Institute

<http://www.worldwatch.org>

Worldwatch is a non profit public policy research organization dedicated to informing policymakers and the public about emerging global problems and trends and the complex links between the world economy and its environmental support systems.

The World Wildlife Federation

<http://www.wwf.ca/satellite/wwfkids/teacher/index.htm>

World Wildlife Fund (WWF) was established to conserve wildlife and wild places. Since its founding in 1961, WWF has effectively safeguarded hundreds of species and millions of acres of wildlife habitat.

WWF has a strong education program called Schools for Wildlife. Through the support of concerned educators, WWF reaches thousands of classrooms and clubs throughout the school year with conservation-oriented curriculum materials.
